**Empathy Map Canvas:**

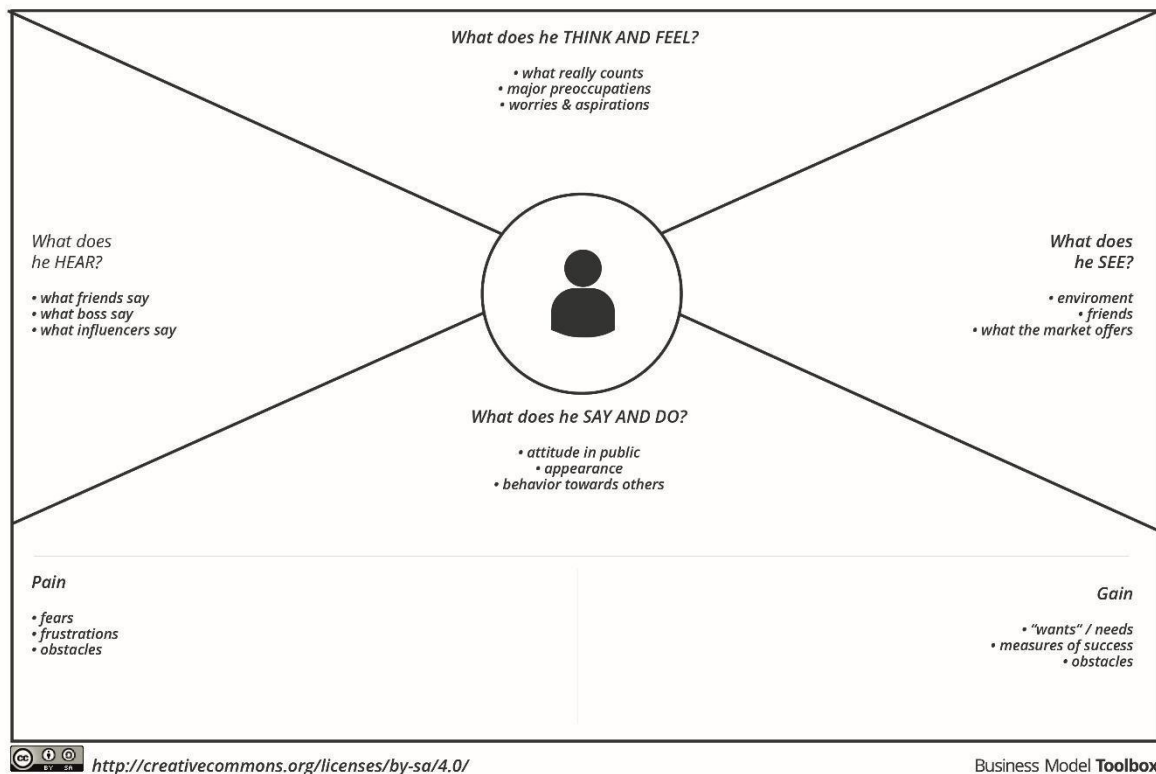

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

**Example:**

## Empathy Map

#### Says

What have we heard them say?  
What can we imagine them saying?

#### Thinks

What are their wants, needs, hopes, and dreams?  
What other thoughts might influence their behavior?

I want an  
easy way to  
discover  
new music.

Which platform  
gives me the best  
music  
recommendations?

Searches for  
new songs  
and creates  
playlists.

Excited when  
discovering a  
new favorite  
song.

#### Does

What behavior have we observed?  
What can we imagine them doing?

#### Feels

What are their fears, frustrations, and anxieties?  
What other feelings might influence their behavior?
